JOHN ALBRECHT

The Association of a Lifetime With Our Friends

—o—

Many years have passed since 1885, when our Nursery was started in its most humble way, with ever in mind "The Great Future" and today we realize that many rungs of the long ladder have been trodden and well worn.

In our Nursery, though the zero winds are blowing; you will always find the warmth of the evergreens; something nature has given man to typify eternal promise—the promise that Spring always will come again, and again it does come; bringing with it an abundance of beautiful color and foliage from the Flowering Shrubs and Trees.

WITHIN our greenhouses will appear a variety of plants and flowers grown especially for our patrons, presenting such plants in season for the home and garden in which no time is spared to produce the best quality. This work is in charge of a responsible member of the firm, who has devoted his lifetime to his business of fair and honest dealing and we further ask you to consult us on any of your flower problems.
